The multidisciplinary aspect of understanding **Health & Wellbeing** offers many significant and fascinating challenges. How to effectively apply research to these challenges requires greater understanding of the needs and priorities in this field, alongside better communication between academic, healthcare and industry professionals.

The WestFocus Network, itself a multidisciplinary consortium would like to invite you to take part in discussing emerging **Health & Well-being** issues and exploring new approaches to finding solutions through network collaborations.

The **Better Networks for Better Health** event has a varied programme of activities to stimulate debate on the challenges and opportunities in the following areas:

Improving research in:

- Metabolic syndromes
- Complementary Medicines
- Hospital Infections
- Nutrition & Health
- Ageing Populations
- Sports Health & Exercise
- Engaging the public in research
- Dental Health
- ICT in Healthcare
- Academic Networks
- Healthcare Networks

If you would like to submit a poster please forward your 300 word abstract to Dr Jo Lawton by 5pm, Friday 23rd May 08. Guidelines for posters may be found on our website. www.lifesciences.org.uk
