

Train the Trainer

- I would have liked to watch a BLS demonstration before the course
- Nice small friendly group
- The session has given me confidence in structuring a session of BLS and I feel more confident in assessing parents learning needs
- Table space for everyone, horseshoe layout
- Don't need 30 minutes for coffee break. More on choking especially with babies with NGT. Good friendly session, made me feel at ease.
- Very informative. I have attended the course previously and felt more in-depth information regarding the BLS which was better. This time more reflection on delivering session and parent feedback and assessment. Good to do the x2 sessions, felt confident knowing I had been carrying out sessions appropriately
