Ex-Utero Exceptions to Care Pathways Q3

There were 3 babies were born in LNUs below their gestational threshold in Q3 2016/17

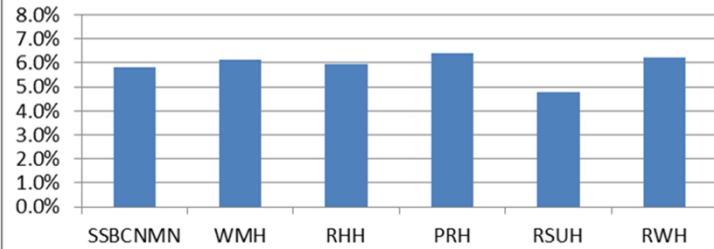

SaTH X 1 <27 weeks gestation

RHH X 2 < 27 weeks gestation

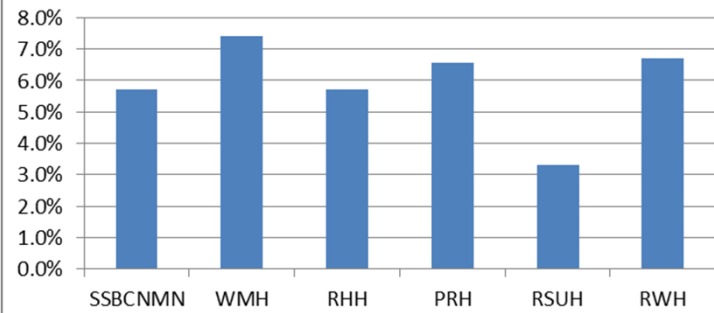

All 3 babies were transferred out to an NICU in 1st 24 hours following birth.

We need to understand the reasons for delivery and review if there were missed opportunities for IUTs to a hospital with an NICU in any of these cases

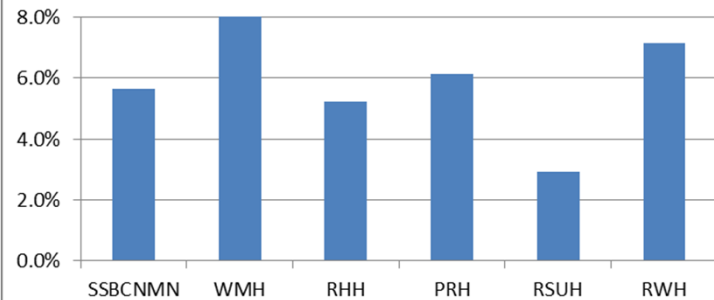

% of Term Live Births Admitted to NNUs Q1

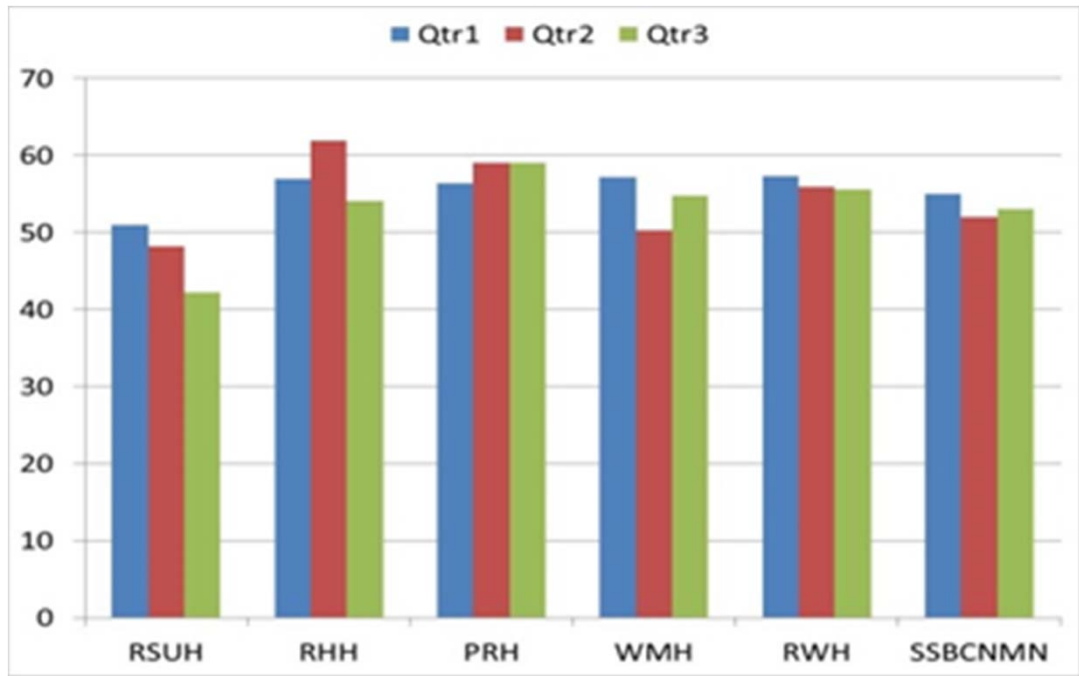

% Term Live Births Admitted to NNUs in Q2

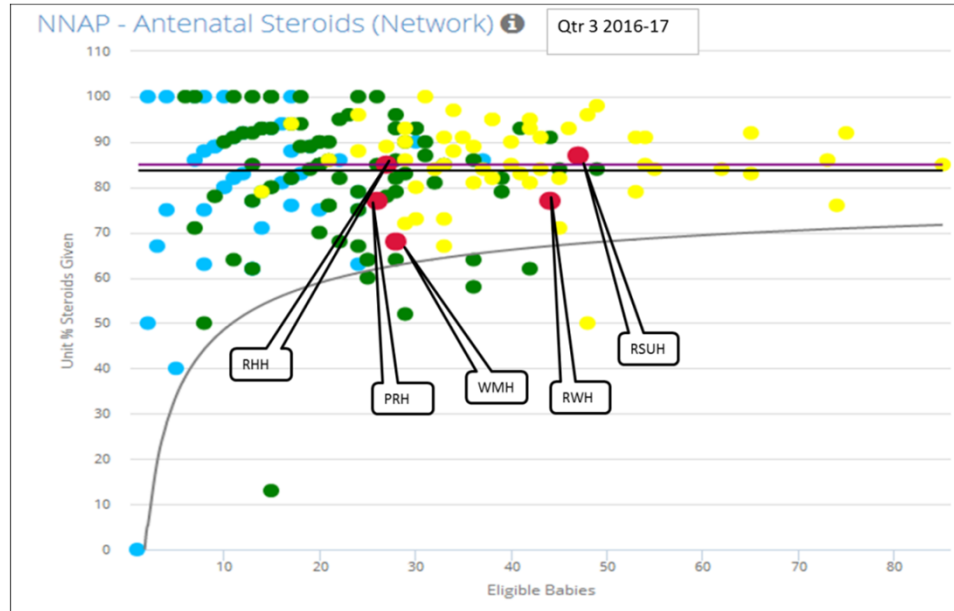

% Term Live Births Admitted to NNUs in Q3

Percentage of all admissions to NNUs that are term babies

Would also be helpful to feedback here the 2 national neonatal audit project (NNAP) measures that are in the hands of Obstetrics to improve – Antenatal Steroids and Magnesium sulphate

NNAP - Magnesium Sulphate (Network)
