

Multidisciplinary Cardiac Study Day

17th March 2016

Mid Staffordshire Postgraduate Medical Centre, County Hospital, Weston Road, Stafford,
ST16 3SA

Aim ~

To enhance the knowledge base of a baby with cardiological problems to improve the delivery of care given in our outreach hospitals within our networks.

Objectives ~

- Gain knowledge around antenatal challenges
- Have an understanding of specialist roles within cardiac centres
- To gain an appreciation of parents perspective and learn how as neonatal staff we can enhance their journey
- To gain an overall knowledge base around the management and stabilisation of a baby with a cardiac problem pre surgery
- Discuss and explore 'real life' case scenarios
