hypoglycaemia management differs with national guidelines

6/29/2018 11:53 AM

[View response](#)

ffp, vit k, clotting appt ratio

6/27/2018 3:18 PM

[View response](#)

Already addressed via emails and amended pdf copies - Chronic lung disease guideline - acceptable sats monitoring, Coagulopathy guideline regarding the numbers. Of note, Need more clarity on Caffeine use in preterms - it was clearer previously and now it is more vague as to which babies need to be started on Caffeine (eg: <30 weeks routinely and if symptomatic in preterms more than 30 weeks). There is also a need to discuss about when to discontinue caffeine.

6/5/2018 12:42 PM

I have the necessary information as a GP trainee

6/29/2018 11:53 AM [View res](#)

details about on going research in the network

6/27/2018 6:38 PM [View res](#)

It would be nice to have guidelines grouped eg. lines, sepsis, fluids and nutrition. Its often very difficult to find the guideline th information you need.

6/24/2018 4:25 AM [View res](#)

+Acidosis secondary to TPN +Diagrams of satisfactory umbilical lines positions.

6/21/2018 2:53 PM [View res](#)

Can't think of any at present

6/20/2018 4:53 PM [View res](#)

Q10

Cust

Would you be interested in reviewing existing guidelines and/or w guidelines for future editions?

Answered: 27 Skipped: 16

A horizontal bar chart with a green bar representing 100% for the 'No' response. The x-axis is labeled from 0% to 100% in 10% increments.
