Hello Sarah,

We discussed this issue at a Consultant Meeting at SaTH. Although there was acceptance of the electronic PDF version, there was an overall feeling that some printed copies of the guidelines book would be useful in case of IT systems being down (although backup printed versions of the PDF could be used for this purpose) and for having a few printed copies for the unit (not necessarily individuals). However, we did also acknowledge that it may not be cost effective to print below a specified number of books.

Please could this be noted, so as to help inform the discussion at the next Guidelines Group on the 14th September.

With best wishes,

Sagarika.
