LEARNING AIM

To provide all front line staff with the knowledge and confidence to deliver the best possible care to bereaved families.

OBJECTIVES

- **To provide an awareness of the process involved in prenatal diagnosis and the planning of subsequent care**
- **To develop an understanding of how other care providers can assist with the bereavement process and enhance end of life care**
- **To have an increased understanding of the impact of baby loss**
- **Understand the positive role all care givers can provide in the initial period**
- **Develop their own knowledge and skills to facilitate informed choice for families**
