Hi Both

Here is the presentation that Julia and her team have presented to HV's, along with her rationale.

Great chatting to you both – seems like ages – well it is ☺

Speak soon

Kind regards

Julie

**Subject:** RE: Neonatal Network

Hi Julie,

Attached is the PowerPoint presentation we have rolled out for our Health Visiting teams (initially in the North) & I think it could be adapted to be marketed regionally and nationally. This is been a great example of Multi disciplinary working & high quality evidenced based training as it's taken 2 years to develop

### **The aims are to:**

#### **To work towards a seamless transfer home from NICU for preterm babies and their families by:-**

- improving communication between the NICU and HV service - inter-agency communication and collaborative working are core concepts of Working together to safeguard children (DfCSF 2013)
- Enhancing the knowledge of health visitors regarding the care and needs of preterm infants
- To improve the experience of families with preterm babies by providing timely, appropriate information, advice and support  
Supporting health visitors with training and resource

The speakers are:

- The Neonatal coordinator- UHNS Rose Ciavucco
- Health Visitor Fiona Corcoran who's previous roll was a community neonatal nurse
- Simon Runnett Hospital at Home team
- Elaine Isherwood and Charlotte Duncalf – community paediatric dieticians
- And most importantly service users from the Helping Hands pre term baby support group

To date we have trained 90 Health Visitors in Stoke, Newcastle & Moorland areas. The evaluation of the training has been overwhelmingly "Excellent"

The training was developed in response to the cutting of the community neonatal service from the

acute trust and the number of serious incidences ( including a baby death) raised following the discharges of babies from NICU at UHNS into the community setting.  
I'm very happy to discuss further. My involvement was to act as the lead and to coordinate all the training for the health visiting teams
