

National Neonatal Dashboard - SSQD Q3 2018/19

There were three "negative alerts" which were flagged in the National Quality Dashboard for Yorkshire & Humber neonatal units in Q3, these were as follows:

1/ All units in YH South - <27wk deliveries at a NICU

YH South total <27wk deliveries at a NICU= 38.5%

National average = 76%

2/ Scarborough - admission temperature (for a pre-defined cohort of babies)

Admission temperature <36C = 25%

1 out of 4 babies eligible had an admission temperature <36

National average = 3.3%

3/ Scarborough - antenatal steroids

Antenatal steroids given = 33.3%

2 out of 6 babies eligible received steroids

National average = 84.5%

All of the above were reported and highlighted in the Network dashboard and in the NNAP reporting prior to outlier reporting status at a National level.
