

Baseline data is required by 28th Feb in order to agree improvement trajectories by 31st March 2018.

This scheme is effective from 1st April 2018 with the aim to have an overall reduction in term admissions into Neonatal Units for intensive care, high dependency care or special care. The aim is to have an admission rate of under 6% of live births by April 2019.

Data items, some of which were collected for the National Neonatal Review in November 2016.
