

## HDU AUDIT 2017 SUMMARY

HDU audit undertaken 01 July 2017 to 31 December 2017 utilising data collection proforma based on the PCCMDS version 2.0 dated 2016. There was a 100% response rate from all hospitals in region. This is 18 hospitals = 14 trusts. A total of 1468 episodes of care were included in the audit.

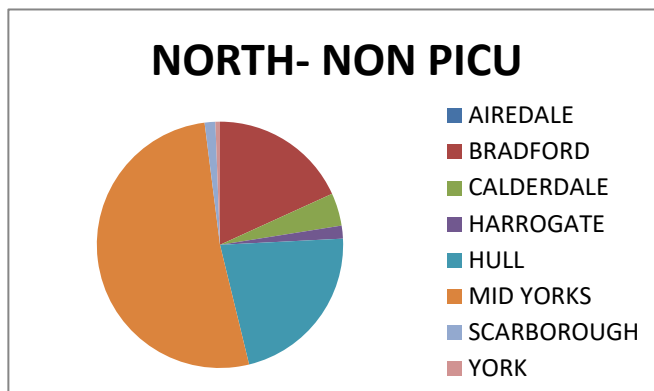

Analysis of the data from the DGH wards outside of designated Level 2 areas shows that:

- 13 hospitals provided some Level 2 care during the audit period.
- There were 458 bed days of Level 2 care during the audit period. 154 of those days were for CPAP.
- Other Level 2 work within the DGH's is predominantly stabilisation e.g. fluid boluses, inotropes and management of Status Epilepticus.
- High Flow nasal cannula oxygen therapy accounted for 825 bed days. All DGH's except one are now able to provide humidified high flow nasal cannula oxygen therapy.
- The amount of level 2 work provided in the DGH setting equates to approximately 3 extra level 2 beds per day
